

Farhan Tayyab Ch.

UI/UX DESIGNER · GAMEPLAY TESTER · WEB DEVELOPMENT FREELANCER

Shad Bagh, Lahore, Pakistan / (+92) 324-1415790 / farhantayyub123@gmail.com / linkedin.com/in/farhantayyab1209 / farhantayyubportfolio.netlify.app

Creative UI/UX Designer and Gameplay tester aiming to build easy-to-use, informative, and visually appealing websites and game. I combine my skills in prototyping, SEO, and database management to create professional digital products that rank well and work smoothly. Currently expanding my expertise through game and app design in Unity and Figma, I am eager to contribute to a forward-thinking team while continuing to grow my technical and design skills.

EXPERIENCE

The Game Storm Studios Pvt (Ltd.) — CMIT IP Internee Jan 2026 – June 2026

Designing and prototyping user-friendly games and mobile interfaces in Figma and Unity. Tested many games, found bugs and glitches, and reported them to developers to improve user experience. Collaborated with developers on responsive layouts and design consistency.

Rhombix Technologies — UI/UX Internee (Remote) Nov 2025 – Jan 2026

Designed and prototyped web and mobile interfaces in Figma. Built responsive layouts with developers, conducted user research, and improved design consistency across products.

Ghani Group of Companies — IT Internee, Lahore Aug 2025 – Oct 2025

Worked as a technical IT member on Oracle projects alongside the IT team, delivering assigned projects in a collaborative environment.

University of Engineering and Technology — SEO & Freelancing Course Aug 2022 – Oct 2022

Worked with freelancers on Google Search Console, SEO tools, and keyword research, applying analytical and research skills.

Al-Khidmah Foundation — Volunteer, Lahore Mar 2024 – Apr 2024

Volunteered with a foundation known for helping the poor; strengthened teamwork and people skills.

EDUCATION

Bachelor of Computer Science

University of Central Punjab, Lahore
Nov 2021 – June 2025 · Major: UI/UX Design · Minor: Front-end Development

Intermediate in Computer Science

Punjab Group of Colleges, Lahore

Languages: C++, Python (Basic), Oracle, SQL, CCN

Tools: Unity, Visual Studio, SEO Tools, Google Search Console, Microsoft Office Suite

Database: Relational Schema Design, Oracle Report Builder

Other: Gameplay testing and bug reporting, data analysis techniques, communication and teamwork

INTERPERSONAL & LANGUAGE

Strong communication, teamwork, and problem-solving skills; adapts quickly to new technologies and works well under pressure.

Languages: English (Basic), Urdu (Fluent), Punjabi (Fluent)

PROJECTS

Employee Management System — Figma system with 100+ desktop screens and states, a consistent visual language, component library, and information architecture for complex HR workflows.

Performix System Design — Company management system UI/UX and prototype in Figma, with front-end development for a stronger website design.

Smart Device Control App — Onboarding, device connection, scanning, and dashboard screens with a consistent palette, smooth navigation, and clearly organized information.

Food Delivery App — Low-fidelity prototype: user flow mapping for restaurant search, menu browsing, cart management, and order tracking; grayscale wireframes for clean hierarchy.

Bull Dog Game UI — Mobile RPG interface: battle screens, hero selection, reward menus, and readable health, skill, and stat bars, aligned with Auto Layout.

Cube Running Game — Three playable levels with obstacle collision, game over, and working Restart and Next Level buttons on a Level Complete screen. Unity and Visual Studio 2022.

Cloud Storage App UI — Onboarding, authentication, and file management in Light and Dark modes; two versions plus premium subscription and pricing screens, built with Auto Layout.

Workout Design — Fitness app: wireframes and high-fidelity mockups for exercise libraries, routines, and progress tracking, with a motivational visual language.

Edge Aura App UI — Clean, minimal app layout in two versions; structured content sections with careful spacing, alignment, and typography for readability.

Sniper Shooting Game UI — Home, weapon selection, gameplay, mission results, and settings screens with clear navigation, consistent color themes, and interactive elements.

Fox Hunter Game UI — Dark theme with neon accents; coin earning, daily rewards, task management, bottom navigation, and dashboards tracking currency and player level.

Word Search Game — Word search game developed in C++.
